Bizcaps' PIM solution has been certified by GS1 UK as capable of correctly and consistently implementing the listed GS1 standards and associated best practise. This certification is valid until 13 February 2019.

Company name:	**Bizcaps Software**
Solution name:	**Bizcaps PIM**
Version certified	4
Description:	Bizcaps PIM allows suppliers (data publishers) to enter all required GDSN data applicable to the requirements of the Australian and NZ National Product Catalogue (NPC) system, industry requirements, and specific data recipient requirements. The solution streamlines data entry for ease of use and to ensure data integrity by providing data pick lists, managing default data, and performing calculations of values where applicable. GS1 business validation rules are built in to ensure that all data is compliant for the NPC system. Complementary industry-specific business rules can also be user configured. The solution includes management of item and pricing data for upload to the NPC.

Certified GS1 standards:

GS1 Identification Keys:	GTIN, GLN
Supplementary data:	Global Product Classification
Master data:	Catalogue and trade item
GDSN validation rules:	Global Validation Rules, GDSN Packaging Measuring Rules, GDSN Target market Specific Validation Rules
Communication format:	GS1 GDSN XML, CIN and AS2

GS1 UK has certified this solution following a defined and consistent process to ensure conformance to the latest relevant published GS1 standards. Bizcaps Software confirms that all the information presented here is true and correct as of the 14 February 2018.
