

KM Soft's Inventory Management solution has been certified by GS1 UK as capable of correctly and consistently implementing the listed GS1 standards and associated best practise. This certification is valid until 26 September 2019.

Company name:	KM Soft
Solution name:	StockAssist 2019
Version certified	N/A
Version date	20 August 2018
Description:	<p>StockAssist is a stand alone inventory management system. It can be cloud hosted, provided as a service, or locally hosted on a clients network.</p> <p>StockAssist comprises a web based interface, which is used for product maintenance and reporting, and a PDA application for a mobile device with an integrated barcode scanner, used for stock movements.</p> <p>StockAssist utilises with the GTIN, Batch or Lot, Serial Number, and Expiry-date Application Identifiers within GS1 barcodes to ensure optimal stock rotation and accurate recording of use.</p> <p>GLN's can be used to identify locations, and GSRN-Provider to identify users if required.</p>
Certified GS1 standards:	
GS1 Identification keys	GTIN, GLN, GSRN
Application Identifiers:	Supplementary data (AI 21,10,17 and 254).
Barcode symbologies:	GS1-128, EAN-13, EAN-8, UPC-A, UPC-E, GS1 DataBar, GS1 DataMatrix and ITF-14

All GS1 barcodes were verified using the latest verification standards (based on ISO/IEC 15416 Barcode Print Quality Test Specifications) as detailed in the GS1 General Specification.

GS1 UK has certified this solution following a defined and consistent process to ensure conformance to the latest relevant published GS1 standards. KM Soft confirms that all the information presented here is true and correct as of the 26 September 2018.
