Company name:	Reath
Product:	Reath Dashboard
Version:	1.0.0
Components:	N/A
Date of approval:	06 October 2021
Valid until:	Valid for one year from the date of approval
Certificate reference:	5012345000107046

The product or service detailed above has been checked by GS1 UK and has met compliance with the following GS1 standards:

- **GS1 identification keys**
  - o **Items:** Global Trade Item Number (GTIN)
  - o **Assets:** Global Individual Asset Identifier (GIAI)

GS1 UK has approved this product following a defined and consistent process to ensure conformance to the latest relevant published GS1 standards.

Further details of the product's capabilities, as tested against each of the appropriate GS1 standards, are included in the appendix of this public report.

Please note: the approval process does not guarantee that every application or usage of the product/service detailed above will result in GS1-compliant outputs. Factors affecting this could include user-error, data used and any interfacing software and hardware.

Paul Reid
Head of standards and consulting
GS1 UK

Appendix

Supporting information:

Items
Products can be identified using a Global Trade Item Number (GTIN)
Specific products can be identified using a GTIN plus a serial number
Assets
Assets can be identified using a Global Individual Asset Identifier (GIAI), Global Returnable Asset Identifier (GRAI) and/or GRAI plus serial component
Interfacing
The product can include GS1 Identifiers in data shared with 3rd party systems

Notes: as part of this approval process, GS1 UK have made the following notes or recommendations regarding the product:

1. Suggestion to apply check digit validation within interface. This currently is a free text field to cater to internal SKUs as well. Reath will work towards check digit validation.

2. There is discussion around working with Digital Link.
