
Company name:	cegedim
Product/service:	Netix
Version:	N/A
Components:	N/A
Date of approval:	23 April 2024
Valid until:	Valid for three years from the date of approval
Certificate reference:	5012345000107111

The product or service detailed above has been checked by GS1 UK and has met compliance with the following GS1 standards:

- **GS1 Identification Keys**
 - **Locations:** Global Location Number (GLN)
 - **Items:** Global Trade Item Number (GTIN)
 - **Logistic units:** Serial Shipping Container Code (SSCC)
- **GS1 EDI**
 - GS1 EANCOM, GS1 XML, GS1 UN/CEFACT XML

GS1 UK has approved this product following a defined and consistent process to ensure conformance to the latest relevant published GS1 standards.

Further details of the product's capabilities, as tested against each of the appropriate GS1 standards, are included in the appendix of this public report.

Please note: the approval process does not guarantee that every application or usage of the product/service detailed above will result in GS1-compliant outputs. Factors affecting this could include user-error, data used and any interfacing software and hardware.

The product can send/receive messages via GS1 EANCOM ³
The product can send/receive messages via GS1 UN/CEFACT XML ³
Interfacing
The product can include GS1 Identifiers in data shared with 3rd party systems

Notes: as part of this approval process, GS1 UK have made the following notes or recommendations regarding the product:

1. Noting the fact that numbers are entered manually, consider the opportunity to put in place a system routine that would verify the number being entered (or loaded) by a client or retailer for check digit correctness ahead of trading partner use. (Testing might not cover all numbers available).
2. Noting the fact that numbers are entered manually, consider the opportunity to put in place a system routine that would verify the number being entered (or loaded) by a client or retailer for check digit correctness ahead of trading partner use. (Testing might not cover all numbers). Also consider using Verified by GS1 for further validation of the product represented as a value added service.
3. Specific messages not checked. Any use of GS1 standard messaging is driven by the retailer's EDI requirement with their trading partners. The adoption of standards will encourage better quality data and reduce errors. Statistics on messages used and GS1 identifiers used would help to baseline and measure for EDI data improvements.
