Coupon issuer list

The coupon issuer list is aimed at major retailers who wish to manage and control the processing of coupons through their stores. The list enables POS tills to be programmed to only redeem coupons from known issuers and to bar coupons from unknown or unwanted issuers. The list also allows the processing of POS data to calculate the value of coupons redeemed from each coupon issuer.

The coupon issuer list includes

- A complete list of all active UK and Euro coupon prefixes that have been issued by GS1 UK

- A complete list of all coupon prefixes which have been withdrawn from use by GS1 UK

- For all GS1 UK coupon prefixes the name of the company to which they were issued and their issue date or the date they were withdrawn

Where it has been provided by the coupon issuer the list also contains:

- Details of who to contact for more information about the coupon

- The industry sector of the company

The list is delivered monthly in Excel format by email to registered subscribers. The cost of a 12 month subscription is £6,000 (excl VAT). Alternatively you can receive a one-off list for £4,000 (excl VAT).
